Covid-19 PAT CAT: Patients over 60yrs with chronic conditions

Recipe Name:	Patients over 60 yrs of age with chronic conditions.
Rationale:	Older patients with chronic conditions are at high risk for Covid-19. This recipe will show you how how many high patients are in your catchment.
Target:	Indigenous patients over 50 yrs of age with chronic conditions.
PAT CAT Starting Point:	1. PAT CAT Open 2. Population Extract Loaded and Extract Pane "Hidden"

Filter Steps:

- On the "General" tab, entre the Start Age = 50

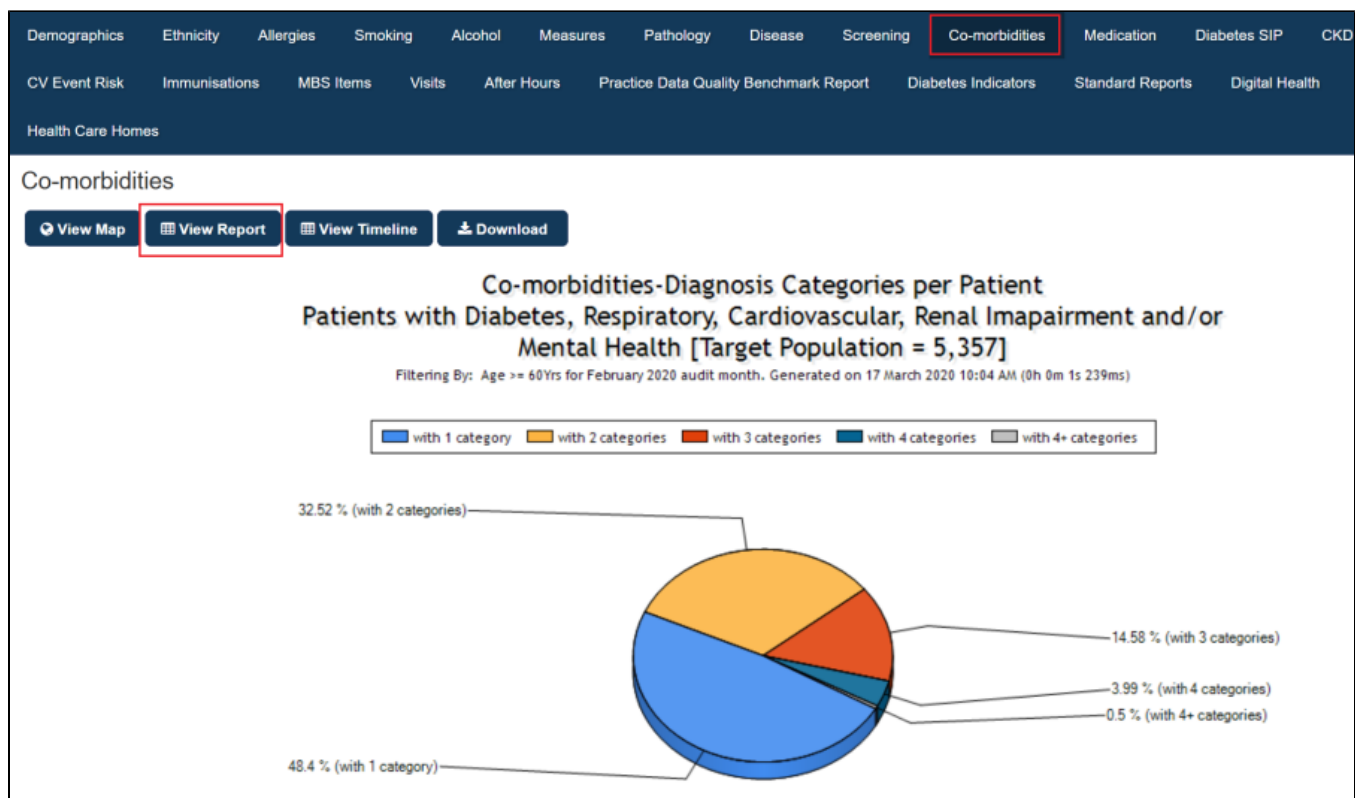

- Click "Recalculate"

Report Steps

- Click on the 'Co-morbidities' report tab.

- Click on 'View Report'
- The adjusted column will give you the number of unique patients over 60 in your catchment and how many of them have one or more chronic conditions. You can also identify practices with higher than average numbers of those patients.

Filtering By: Age >= 60Yrs for February 2020 audit month. Generated on

Measure	PHN	PHN %	Adjusted
Total Population	9,273		4,541
Target Population	5,357	57.77 %	2,338
with 1 category	2,593	48.40 %	1,204
with 2 categories	1,742	32.52 %	771
with 3 categories	781	14.58 %	284
with 4 categories	214	3.99 %	71
with 4+ categories	27	0.50 %	8

Additional filters, such as 'active patients' or other age criteria can be applied to modify this recipe. You can also search for patients with specific chronic conditions only, by using the Conditions filter. Please keep in mind that this filter is an AND filter – you can only add more conditions to your search such as asthma AND COPD AND diabetes.
