Covid-19 PAT CAT: Patients with cancer
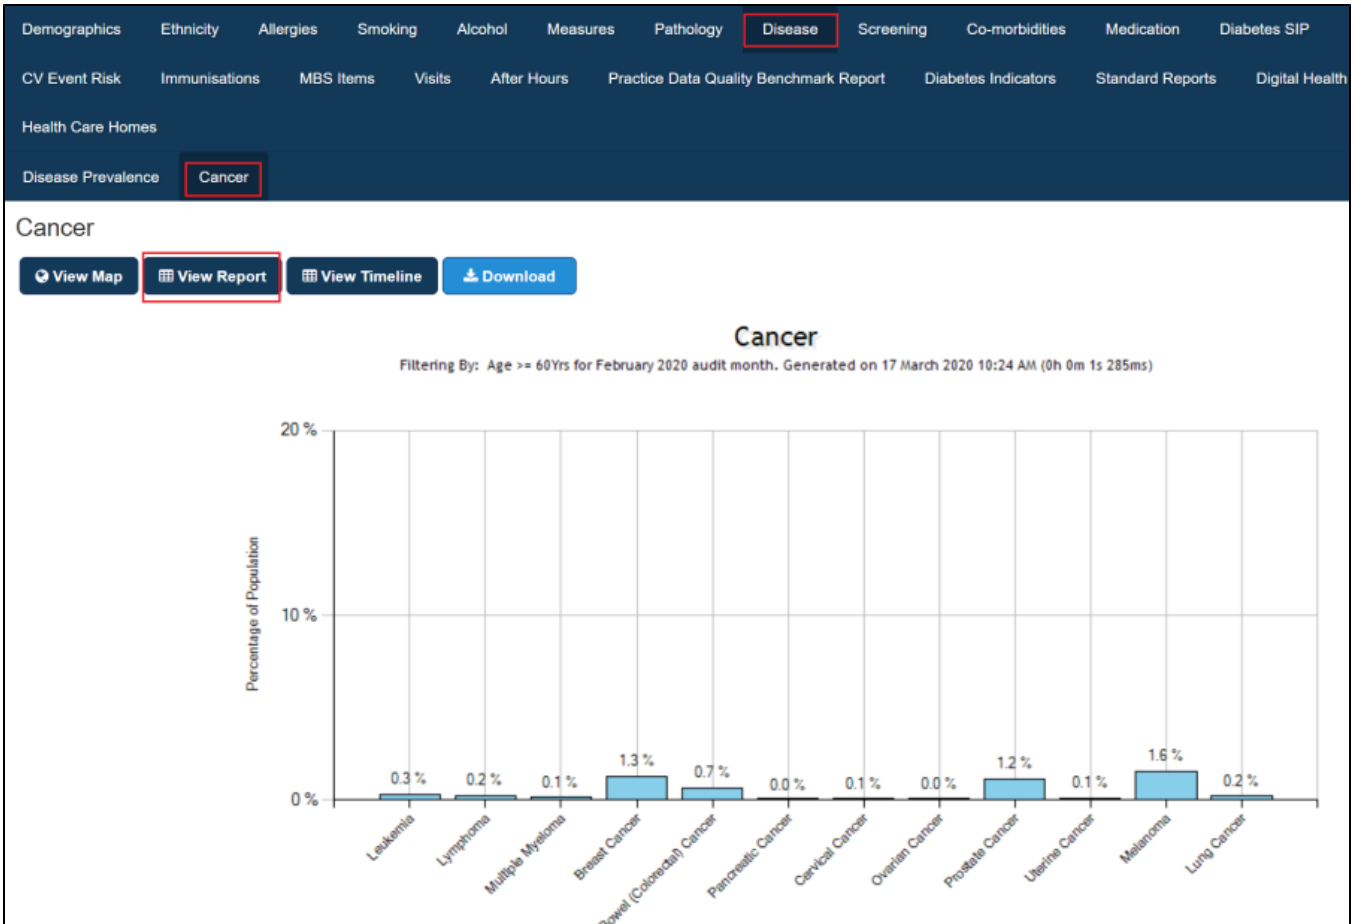

Recipe Name:	Patients with cancer
Rationale:	Patients with cancer have been identified as high risk for Covid-19. This recipe will help you to assess the numbers those patients in your catchment.
Target:	Patients with a cancer diagnosis
Recipe Limitations:	The cancer diagnosis needs to be coded in the patient record and 'active'
CAT Starting Point:	1. PAT CAT Open 2. Population Extract Loaded and Extract Pane "Hidden"

Filter Steps
No filtering required

Report Steps

- Click on the 'Disease' report tab and select the 'Cancer Conditions' report

- Click 'View Report' to see the details of the report
