

# Visits

CAT4 counts any entry in the patient progress notes that is not clearly marked as being non clinical as a visit. To check the details please refer to our mapping guides for your clinical system:

[General Data Category Mappings BP](#)

[General Data Category Mappings MD3](#)

***Note that in some clinical systems it is not possible to distinguish a clinical contact from other notes made in the patient record. This will affect the quality of the data reported as non clinical entries in the patient record will be counted as visits.***

Adding/reviewing pathology results is not counted as a visit!

The **Visits** tab provides a number of sub tabs.

- [Last Visit](#)
- [Assigned Provider](#)
- [Visit Types](#)
- [Episode Count](#)
- [Contacts by OSR Worker Type](#)
- [Age Gender Visit Count](#)
- [Disease Visit Count](#)
- [Visits Last Week \(new patients\)](#)
