

Programs

Programs can be accessed from the Dashboard to users currently participating in one or more programs. Access is regulated by licensing and some programs are available to all CAT users. Most of the reports available to you through the programs icon are also available on the CAT4 view which shows all reports. However using the programs icons will give you access to some special reports and also make access quicker and easier as you don't have to browse through all reports to find the ones relevant to the task at hand.

Click on the 'Programs' icon on the dashboard to see the available programs.

More programs will be added to the currently public ones listed here:

- [Amgen REFRAME Program](#)
- [Hepatitis B Screening and Management](#)
- [RACGP PLAN - QI and CPD Program](#)
- [Amgen REFRAME Lipid](#)
