

CAT4 Release notes V4.27 September 2020

- This update addresses the changes for the PIP QI Quality Improvement Measures (QIMs) as defined by the Department of Health.
 - Some of the key changes to the reports:
 - Patients who declined immunisation are not included in the relevant QIMs (only available for MD users)
 - Patients with 'undefined diabetes' are now included in the relevant QIMs
 - Age group for cervical screening is now aligned with national guidelines (25-74)
 - Patients with existing CVD are excluded from QIM08 and indigenous patients are included from age 35
- Self-Funded practices have the option to export the 10 QIMs only for upload - [PHN Portal use for PIP QI data \(pdf\)](#)
- Other changes:
 - Heart Failure is now included in the CVD category. This will also affect the CV event risk report as CVD is an exclusion criteria
 - Pneumococcal vaccination schedule changes have been implemented for the relevant immunisation reports
 - Additional Covid-19 PCR and Serology mapping has been added
 - Fixes
 - Fixed Fasting Blood mapping issue for BP users
 - Fixed influenza vaccine mapping for Zedmed users
 - Performance enhancement and minor fixes
