

# Recall CAT - Sending SMS Messages

After you have applied one or more filters and/or cross tabulations and have selected the group of patients of interest, you will see the choices for SMS Recall and other options at the bottom of the patient re-identification report. This can be applied to all of our [CAT RECIPES](#) or any custom search you want to perform

Topbar Prompt

Once you click 'SMS Recall', the SMS Recall window will be displayed with your clinic name (as entered in the [setup steps](#)) displayed. Enter a message related on the purpose of the notification. The inclusion criteria are displayed for your reference to show the criteria used for this SMS notification.

There are a number of options below the inclusion criteria:

- Patients who have opted out of receiving SMS from your clinic are removed by default
- If you are using an online booking system and have configured it in your account (see here for details: [Recall CAT - Setting up your Account](#)) then you can tick the box to include that link in all SMS
- Include opt-out message at the end of the SMS is on by default. If a patient replies "STOP" they will not receive further SMS message sent through CAT4

Clicking on "Send" will send the message to all patients with a valid mobile phone number in their record.

Please note that for Best Practice the option to [Add or Withdraw Consent](#) will not appear. This means that if a patient replies back and withdraws consent, you will need to change this manually in Best Practice

 SMS Recall

**SMS Text:**

*[type message here]*  
To opt-out reply STOP

Characters Remaining: 137

**Inclusion Criteria:**

Filtering By: None  
Selected: Population Pyramid (Any)  
Excludes opt out patients
