

Baby Birth Weight

Patient Record

This report shows a pie chart for children aged 0-7 by the birth weight recorded in their patient record. The birth weight is the weight taken on the patient's birth date.

Mothers Antenatal Record

This report shows a pie chart for patients who gave birth in the last 12 months by the birth weight recorded in the completed pregnancy record.

For full details on where to enter the birth weights for each report please refer to the [mapping guide](#) for your clinical system and check under 'General Data Category Mapping'
