Saving Filter Criteria

The 'Saved Filters' tab allows a set of filter criteria to be saved as a named search. Saved searches can be reloaded at a later time and rerun. This gives the ability for practices to run the same filters over intervals of time and against different data snapshots and compare results.
A saved filter can also be set as the default and be automatically loaded each time CAT4 opens.

General	Ethnicity	Conditions	Medications	Date Range (Results)	Date Range (Visits)	Patient Name	Patient Status	Providers	Risk Factors	Saved Filters

| Filter Name	Description
40 - 49 no diab	Filtering By: Males/Females Age >= 40 Age <= 49 Conditions : Diabetes - No
