

Diabetes Sip Data Category Mappings Zedmed

The table below lists the data items that make up the Diabetes SIP. It combines data items already provided in the preceding sections and is provided for the convenience of having these data items listed together.

CAT Category	Clinical System Mapping
Diabetes SIP item	Summary View Panel > Measurement tab
HbA1c	Measurements > Pathology > HBA1C
Eye Exam	Measurements > Other > Eye Exam Complete
BMI	Measurements > Physical > BMI
BP	Measurements > Physical > BP Sitting
Foot Exam	Measurements > Other > Foot Exam Complete
Cholesterol	Measurements > Pathology > Cholesterol
Triglycerides	Measurements > Pathology > TRIG
HDL	Measurements > Pathology > HDL
Microalbuminuria	Measurements > Pathology > TRIG This indicator uses both Microalbumin and/or ACR test results
Smoking	Patient Details > Smoking tab
eGFR	Measurements > Pathology > eGFR
Medication Review	tba

NOTE: Pathology results received in HL7 format will be viewable from the Summary Views panel Measurements tab and will be extracted for CAT. Note there are an additional 4 Diabetes SIP items that CAT does not provide data items for:

- Physical Activity
- Self Care Education
- Dietician Review
- Medication Review
