Setting up CAT Prompts in CAT4

Requirements

To use CAT Prompts you have to have the latest version of Topbar and CAT4 installed. Please contact your PHN to enquire about how to get access to the CAT Plus suite.

Configuration

CAT4 needs to be linked to Topbar. This should have happened during the installation, but if you are unsure if it is linked, follow the steps in the CAT4 Configuration guide.

There is no further configuration required once the link is established.
