

CAT4 Release Notes V4.3 June 2016

This upgrade contains:

- CAT4 User guides are now available through the Pen CS online help content management system. These are accessed via the Help > CAT User Guides option as before.
- Smoking > a new Smoking Cessation tab has been added under Smoking providing details of 'Readiness to Quit'. This data is currently only able to be extracted from the MD3 clinical system
- Alcohol status is now being extracted from the new MD3.16a AUDIT-C Alcohol Assessment
- The 'Undefined Renal Failure' filter has been removed as it no longer relevant
- MBS Eligibility graphs now have the eligible population description added
 - GPM/TCA Eligibility has been revised with more relevant timeframes
- eHealth has been renamed Digital Health
 - A new provider details graph has been added to the SHS upload reports
- Childhood Immunisation graph now provides the Hep A vaccine in a separate category to help services better manage the schedule
- Cleansing Reports
 - Indicated Diabetes now excludes HbA1c<6 alone as an indicator as it is used as screening test
 - Indicated Mental Health now excludes patients with any mental health diagnosis in their past history (active or inactive)
- NKPI report – PI20 – risk factors for CVD has been added
- The Date Range Visit filter has been corrected for Communicare users
