

Find all patients currently residing in a RACF who are likely to benefit from a palliative care approach.

Unknown macro: 'export-link'

Recipe Name:	Find all patients currently residing in a RACF who are likely to benefit from a palliative care approach.
Rationale:	<p>Patients living in RACFs are older, frail, have poor functional status, multiple comorbidities and compromised immune systems ¹. This means that a palliative approach is often appropriate for most residents ². Palliative care is recognised as core business for RACFs³.</p> <p>RACF residents receive less specialist palliative care support than those living at home and therefore are at greater risk of not having their palliative care needs identified and addressed⁴.</p> <p>This recipe assists practitioners, who are VMOs and care for patients residing in RACFs, to identify patients with potential palliative care needs.</p> <p>1 Garibaldi RA. Residential care and the elderly: the burden of infection. J Hosp Infect 1999; 43:S9–18.</p> <p>2 https://www.palliaged.com.au/tabid/5604/Default.aspx</p> <p>3 https://palliativecare.org.au/palli8-core-business-in-aged-care</p> <p>4 https://palliativecare.org.au/wp-content/uploads/dlm_uploads/2019/07/Palliative-care-in-aged-care_Royal-Commission-Issues-Overview_May-2019.pdf</p>
Target:	Patients residing in a RACF, based on MBS items claimed that are only available to such patients.
