

Patients aged 52 – 74 with a previously recorded mammogram in the last 24-27 mths who are eligible and due for breast screening in the next 3 months

 Unknown macro: 'export-link'

Recipe Name:	Patients aged 52 – 74 with a previously recorded mammogram in the last 24-27 mths who are eligible and due for breast screening in the next 3 months
Rationale:	<p>This recipe identifies patients who have screened and are will soon be due to re-attend screening.</p> <p>General Practice plays an important role in encouraging patients to continue to screen, practices can use this recipe to remind patients to continue to screen.</p>
Target:	Female patients aged 52 -74 years, with a recorded mammogram in the past 24-27 months
Recipe Limitations:	<p>This report excludes patients with a number of conditions under the 'ineligible' category.</p> <p>Practices should be aware of the diagnosis codes that PEN uses to assign patients to 'ineligible'.</p> <p>Practices should undertake periodic clinical review of patients in the 'ineligible' category to assess if any of these patients should return to screening.</p> <p>Your practice may have patients that you consider clinically ineligible for screening that are not captured by these diagnosis codes. These patients should be manually opted out of screening.</p>
CAT Starting Point:	<ol style="list-style-type: none">CAT Open - CAT4 view (all reports) loadedPopulation Extract Loaded and Extract Pane "Hidden"<ol style="list-style-type: none">Filter Pane openOPTIONAL under the 'General' tab 'Active Patients' (3x <2 years) selected

CAT4 starting point

RECIPE Steps Filters:

- In the "General" Tab, enter Start Age = 52 and End Age = 74. Practices should decide if they want to send screening reminders to active patients only. Population based screening programs target asymptomatic patients. You may have some patients who consider your practice their medical home who do not fit the criteria for being an 'active' patient. **If required, select 'Active' to search for your active patients only.**

Clear General

You can select the Gender/Female but the report will automatically show female patients as well as patients with no gender entered. This is the preferred approach, as it will include all patients potentially at risk including those without gender information entered.

Practices should review those patients for whom no gender is entered to ensure they are only sent appropriate cancer screening reminders. Consideration should be given to keeping a register of transgender, gender diverse and intersex patients to support this process

- Click "Recalculate"
- Click 'Hide Filters'

Report Steps

- Select the "Screening/Mammogram" tab

This report will show the selected patients and their mammogram results. Select the following category from the graph:

- >2-3 years

- To see the list of eligible patients, click the 'Export' button after selecting the categories listed above. The list of patients can then be sorted by the Mammogram Date to find those overdue by at least 28 months. To sort click on the up/down triangles above the column:

Refine Selection Add/Withdraw Patient Consent Go Share Plus SMS Recall Voicemail Recall Topbar Prompt

The report can also be exported to be sent to the national cancer register for bulk enquiries on patients cervical screening status.

To Export Patient List to Microsoft Excel:

1. Click on the “Export Icon” at the top of the Patient Reidentification window.

2. Click on “XLSX”
3. Choose a file name and a location to save to (eg. Create a folder C:/ClinicalAudit/CAT Patient Follow Up)

4. Click "Save"

The steps above will produce a list of patients with contact details in MS Excel which can then be used to:

1. Produce a mail merge or bulk SMS to remind patients to attend cancer screening.
2. Phone patients to update their record or to remind them to attend cancer screening.
3. Go back through the individual patient records in the GP Clinical Desktop System (CDS) and update known records

Optional Steps

There are a number of optional steps you can add. In the interest of keeping these recipes short, the optional steps are available in separate guides. You can combine the steps above with one, two or all three of the optional steps depending on your target group of patients.

[Using Topbar Prompts in Recipes - create reminders for your clinicians based on the recipe searches](#)

[Using Recall CAT in Recipes - SMS and Voicemail directly from CAT4](#)

[Combine Screening Searches with MBS item eligibility - recall patients who are also eligible for MBS items related to chronic disease care or prevention](#)
