

April 2022

Topbar version 2.18

This Topbar release brings the following changes and fixes:

- Include indigenous patients from age 30 in the Heart Health Check MBS item in the MBS app
- Improvement for showing indicated condition in Data Cleansing App
- Improvement for CAT Plus prompts to cover COVID-19 disease prevalence
- Improvement for Topbar logs to keep up to 90 log files
- Fixed issue with permission manager role not being able to see any apps
- Fixed issue with third party apps where a patient's medication records are showing incorrect status
- Fixed issue with reset button on the settings page
- Added additional influenza vaccines under influenza mapping
- Added new diagnosis items for heart disease for COVID At Risk
- Added new health fund names that were previously not picked up by Topbar
- Added new diagnosis and pathology mappings for Best Practice CIS
- Code sign dlls and exes with SHA256 digest algorithm
