

CAT4 Release Notes v4.47 February 2023

- New CAT report on CSIRO Risk Stratification (license controlled)
- Added a new functionality where CAT opens the most recent data extract upon login (licence controlled)
- Added PAT2CAT/Customer filters tab
- Added Medication script date range filter in CAT Reframe Osteoporosis report
- Show username and practice name under About CAT
- Added new mappings for Cervical Screening and Bone Mineral Density
- Added new functionality to submit de-identified data to PAT
- Removed MBS items 2712 and 2713 from GP-MHTP category from CAT-MBS Items reports (The MBS items 2712 and 2713 are still mapped under (not removed from) GP-MHTP Review and GP-MHTP Consult, respectively)
- Fixed Cancer Screening reports issues where data was not showing correctly
- Fixed data submission issues for multi-location practices
- Fixed data quality issues for QUEL practices
- Fixed an issue for Genie practices where HbA1c date format was incorrect
- Fixed MBS attendance filter issue where recalculate button was not appearing after selecting 'Any of selected' radio button
