

CAT4 Release Notes V4.13 October 2018

This upgrade contains:

- MBS Attendance filter which allows you to find patients who had a particular MBS item or a group of items claimed (or not claimed) in a specific time period. For full details on this new functionality please see here: [MBS Attendance Filter](#)
- NSW Data Linkages preferences for project certificate creation. This is only relevant for participants in the NSW Data Linkages project.
- Immunisation graphs patient reidentify report now includes the name of the vaccine given.
