Topbar Release 1.3 - July 2015

Thank-you for making Topbar Australia's fastest growing general practice point of care solution! Together we are changing general practice data, improving patient health outcomes and removing the laborious every-day tasks through the state of the art innovation.

Automatic Start-Up & Login (Optional)

No need to remember another password, simply sign in to MD or BP and let Topbar do the rest!

Click here to find out how to do it: http://help.pencs.com.au/topbar/Topbar_User_guide_V1.3.pdf

Cleansing App Expands!

The huge improvements to general practice data through the Cleansing App is creating a storm and practices are looking for more. We've added the following optional notifications to make sure you're ready for accreditation long before the assessment:

- Additional missing Demographic items
 - Next of Kin
 - Medicare Number
 - Emergency Contact
- Additional missing Clinical Items
 - Family History
 - Allergy Reaction
 - Immunisations
 - Diagnosis Coded
 - Physical Activity

We've tinkered with our 'Indicated Diabetes - no Coded Diagnosis' algorithm to find patients with an HbA1c of 6.5 or greater.
