

CAT4 Release Notes v4.50 September 2023

- Improvement of data extraction auto-load functionality:
 - To show a dialogue window for "loading" upon opening CAT.
 - To load the most recent full file instead of a de-identified file.
- The Diabetes SIP Report has been renamed to Diabetes ACC Items for a more accurate representation as per the current workflow. The graphs in the report have not changed.
- Mapping has been updated for Influenza, dTpa, Hib, Hep B and Polio for all Patient Management Systems (Best Practice, Medical Director, Zedmed and Genie).
