

# Risk Factor Filtering

The risk factor filter provides indicators around risk such as smoking, alcohol, pregnancy and more. As with all filters in PAT CAT the functionality is the same as in CAT4 and full details for the risk factor filter are provided here:

[Risk Factors Filtering CAT4](#)

The option to filter for patients at risk for pneumococcal disease uses a complex list of criteria, for full details see here: [Details of Risk Factor Filter Pneumococcal](#)
