Birth weight	For the Maternal Health Care report, CAT can extract the birth weight of the child from two sources. One is the child's record, which needs the weight entered and the date backdated to the child's birthday - this will be picked up under the 'Patient Record' report. For the Mother's Antenatal report the birth weight of the child has to be recorded in the mother's record. Under the Obstetric tab the 'Past Pregnancy' button will open a new window where the details of the baby, including the birth weight, can be entered. **Past Obstetric History** Pregnancy No. 1 Finish date: 29/08/20' Gestation (wks): Outcome Normal vaginal delivery ▾ ◉ Para ◯ Termination ◯ Miscarriage Notes: Labour Stage 1: 24hrs Stage 2: 35min Stage 3: 20min Episiotomy/tear: Episiotomy Baby Name: BABE BABE Birth weight (gms): 3200 Gender: Female ▾ Feeding Apgar 1: Apgar 5: ◉ Breast ◯ Bottle Save Cancel

M a m m o g r am	⊘ If you are not receiving your results electronically, you will have to enter the test results manually using one of the names specified in the mapping guides. Please check the links below for details. Also please note that CAT4 can't pick up a mammogram test from your conditions or past history list - it has to be a test name! Mammogram results are not sent electronically in all states, but if test names are entered manually into the results tab CAT4 will pick up that the test has been done. The following test names are recognised: • Breast Mammogram Screening • Bilateral Mammography • Ultrasound Breast Bilateral • Wesley Breast Clinic Consultation Report • Mammogram • Mammogram-normal • Breast Mammography • Mammography - Bilateral • Mammogram Breastscreen NSW • Screening Mammogram - BreastScreen Queensland To add a test name manually to the Results tab in MD3 and right click in the results area to bring up the 'Add' option: Then add one of the test names above and save the result (there has to be some text in the result field but CAT4 will only extract the test name from the 'Subject' field:
