# Shingles Vaccine Eligibility 2: First Nations people aged 50 and over

Recipe Name:	Identify First Nations people aged 50 and over
Rationale:	About 1 in 3 people will get shingles in their lifetime. Shingles usually affects older people, and the risk of complications increases with age, particularly for:  • those over the age of 65  • First Nations people aged 50 and over  • immunocompromised people aged 18 years and over
Target:	Aboriginal and Torres Strait Islander people over 50 years or older
CAT Starting Point:	<ol> <li>CAT Open</li> <li>Population Extract Loaded and Extract Pane "Hidden"</li> </ol>

## In the Filters Pane:

Step 1 (optional): In the "General" tab, select "Active (3x in 2 yrs)"

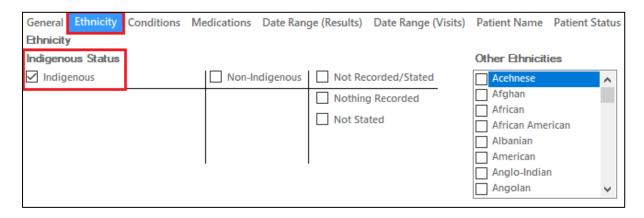

Step 2: In the "General" tab add Start Age "50"

Step 3: In the "Ethnicity" tab, select "Indigenous" under Indigenous Status

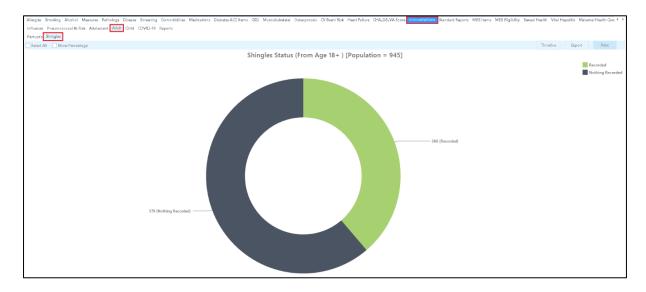

Step 4: Click "Recalculate"

This has generated cohort of all active patients who are Aboriginal and Torres Strait Islander and 50 years or older

## In the Reports Pane:

Step 5: Under the "Immunisations" tab, select "Adult" & select "Shingles"

Step 6a: Select "Recorded", then select "Export" to see Aboriginal and Torres Strait Islander people aged 50 and over who already have received Shingles vaccine (Shingrix or Zostavax) regardless of dose number.

#### OR

Step 6b: Select "Nothing Recorded", then select "Export" to see Aboriginal and Torres Strait Islander people aged 50 and over who have not received Shingles vaccine (Shingrix or Zostavax)

## **To Export Patient List on Microsoft Excel:**

1. Click on the "Export Icon" at the top of the Patient Reidentification window.

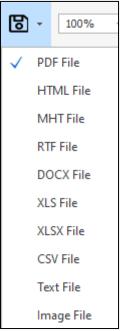

- 2. Click on XLS File
- 3. Choose a file name and a location to save to (eg. Create a folder C:/ClinicalAudit/CAT Patient FollowUp)
- 4. Click "Save"

The steps above will produce a list of patients with contact details which can then be used to:

- 1. Go back through the individual patient records in the GP Clinical Desktop System (CDS) and update known records
- 2. Phone patients to update their record
- 3. Produce a mail merge to recall patients for follow-up

Similar steps can be taken to export the list in the following formats;

In these scenarios, the spreadsheets would then be sent to the Practice Nurse, asking for the patients on these lists to be recalled to administer the vaccine.

# **Optional:**

# **Create a prompt to display in Topbar**

Remember you need to be in the CAT4 Daily View to be able to create prompts. Other pre-requisites are:

- Topbar is installed
- CAT4 is linked to Topbar via Edit/Preferences/Topbar

To start click on the 'Daily View' icon on the top of your CAT4 screen:

Once you have applied the filter(s) and displayed the patients of interest as described above, you can create a prompt that will be shown to all clinicians using Topbar if a patient meeting the prompt criteria is opened in their clinical system. The full guide is available at CAT PLUS PROMPTS and a short guide on how to create prompts in CAT4 can be found at Creating a Prompt in CAT4

To start you have to use the drop-down menu at the bottom of the patient details report and select "Prompt at Consult - Topbar" then click on "Go" to give the new prompt a name.

The name you enter is the prompt text displayed in Topbar, so choose a simple but clear name that tells the clinician seeing the prompt what should be done.
