

Patients with respiratory conditions and no smoking status recorded

[Click here to export this guide to PDF](#)

Recipe Name:	Patients with respiratory conditions and no smoking status recorded
Rationale:	<p>Compared with non-smokers with asthma, smokers with asthma have:</p> <ul style="list-style-type: none">• more asthma symptoms• worse asthma control• a more rapid decline in lung function• more airway inflammation• less response to preventer medication <p>Therefore it is important that the smoking status is recorded for every patient diagnosed with a respiratory condition.</p>
Target:	To effectively manage asthma and COPD patients through establishing adequate recording systems.
CAT Starting Point:	<ol style="list-style-type: none">1. CAT Open - CAT4 view (all reports) loaded2. Population Extract Loaded and Extract Pane "Hidden"<ol style="list-style-type: none">1. Filter Pane open and under the 'General' tab 'Active Patients' (3x <2 years) selected (this step can be omitted if you want to search for all patients).

RECIPE Steps Filters:

- In the 'General' Tab, enter the 'Start Age' 10

1464	Surname	Firstname_282	Firstname_282	F	13/10/1973	12 John St	Suburb Town	2607	H:07 50505050 W:07 50509999	1234999999		Not recorded

Buttons: Refine Selection, Add/Withdraw Patient Consent for Sharing Data, Go, Close

This will list all active (if selected on the general filter tab) patients with chronic respiratory problems that have no Smoking status entered.

Create a prompt to display in Topbar

Remember you need to be in the CAT4 Daily View to be able to create prompts. Other pre-requisites are:

- Topbar is installed
- CAT4 is linked to Topbar via Edit/Preferences/Topbar - check here for details: [Linking CAT4 to Topbar](#)

To start CAT4 in the Daily View, click on the 'Daily View' icon in the dashboard:

Once you have applied the filter(s) and displayed the patients of interest as described above, you can create a prompt that will be shown to all clinicians using Topbar if a patient meeting the prompt criteria is opened in their clinical system. The full guide is available at [CAT PLUS PROMPTS](#) and a short guide on how to create prompts in CAT4 can be found at [Creating a Prompt in CAT4](#)

To start you have to use the drop-down menu at the bottom of the patient details report and select "Prompt at Consult - Topbar" then click on "Go" to give the new prompt a name.

The name you enter is the prompt text displayed in Topbar, so choose a simple but clear name that tells the clinician seeing the prompt what should be done.

Reidentify Report [patient count = 103]
 Filtering By: Conditions (Diabetes - Yes), Last Results <= 12 mths, Selected: H

ID	Surname	First Name	Known As	Sex	D.O.B	Address
2623	Surname	Firstname_58	Firstname_58	M	01/02/1979	12 Jog
3891	Surname	Firstname_59	Firstname_59	M	01/02/1970	12 Jog
6993	Surname	Firstname_264	Firstname_264	F	01/02/1974	12 Joh

Topbar Prompt
 Name: message to clinician goes here
 Filters: category (Diabetes): Yes, Last Results <= 12 mths
 Charts: HBA1c Status in %: No HBA1c Recorded

Refine Selection, Add/Withdraw Patient Consent, HCH Enrolment, SMS Recall, Voicemail Recall, Topbar Prompt

To Export Patient List to Microsoft Excel:

1. Click on the "Export Icon"  at the top of the Patient Reidentification window.
2. Click on "Excel"
3. Choose a file name and a location to save to (eg. Create a folder C:/ClinicalAudit/CAT Patient FollowUp)
4. Click "Save"

The steps above will produce a list of patients with contact details in MS Excel which can then be used to:

1. Go back through the individual patient records in the GP Clinical Desktop System (CDS) and update known records
2. Phone patients to update their record
3. Produce a mail merge to recall patients for follow up
