Pain Relief Yes No

NSAIDs No

COX2 No

Narcotics/Opioids No

Paracetamol No

Musculoskeletal Yes No

Gout preparations No

Osteoporosis No

DMARDs No

Clear Medications

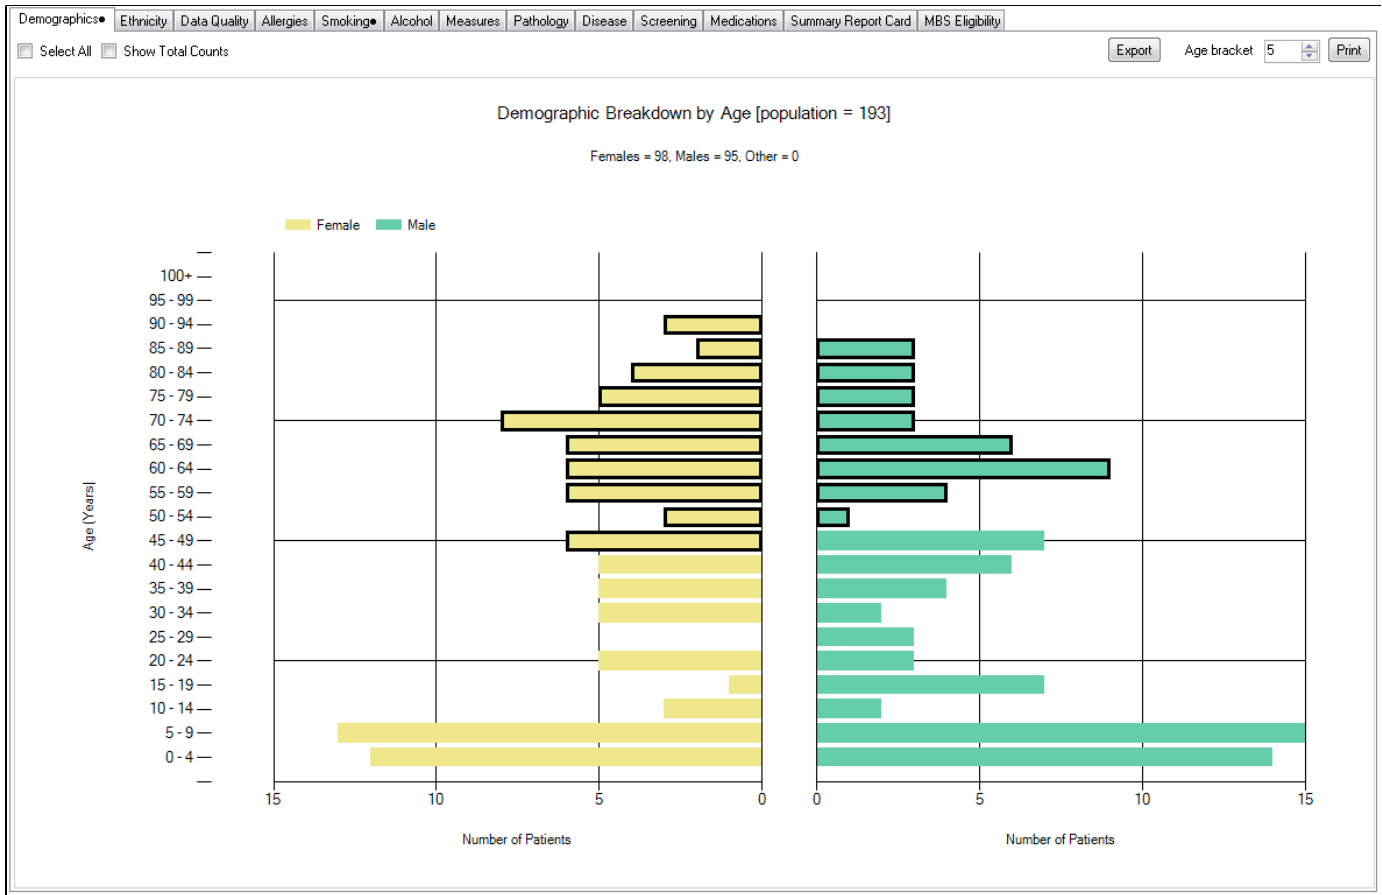

- Click 'Hide Filters'

Recipe Steps Reports

- Select 'Smoking' tab
- Click on "Daily Smokers" and then on the "Irregular Smokers" part of the graph

This will filter for all active (if selected on the general filter tab) patients that are currently on Glucocorticoids and smoke. There are two ways to target the relevant age groups (for women ≥ 45 yrs and men ≥ 50 yrs). You can click on the age groups of interest on the 'Demographic' tab in the report pane:

- Then click 'Report' on top of your screen:

Medical Director 3, HCN Live Data; Extract Date: 13/10/2015 9:27 AM; Filtering By: Medications (Glucocorticoids - Yes), Active Patient
Selected: Smoking (Daily, Irregular), Demographics (Females, 45-94; Males, 50-89)

Demographics • Ethnicity • Data Quality • Allergies • Smoking • Alcohol • Measures • Pathology • Disease • Screening • Medications • Summary Report Card • MBS Eligibility

Or you can use the 'General' tab in the filters to apply a filter for female or male clients at the right age. Please note you will have to do this once for females and once for males.

General • Ethnicity • Conditions • Medications • Date Range (Results) • Date Range (Visits) • Patient Name • Patient Status • Providers • Risk Factors • Saved Filters

Once you have applied the filter above you can click on 'View Pop.' to see all clients you have filtered for.

Create a prompt to display in Topbar

Remember you need to be in the CAT4 Daily View to be able to create prompts. Other pre-requisites are:

- Topbar is installed
- CAT4 is linked to Topbar via Edit/Preferences/Topbar - check here for details: [Linking CAT4 to Topbar](#)

To start CAT4 in the Daily View, click on the 'Daily View' icon in the dashboard:

Once you have applied the filter(s) and displayed the patients of interest as described above, you can create a prompt that will be shown to all clinicians using Topbar if a patient meeting the prompt criteria is opened in their clinical system. The full guide is available at [CAT PLUS PROMPTS](#) and a short guide on how to create prompts in CAT4 can be found at [Creating a Prompt in CAT4](#)

To start you have to use the drop-down menu at the bottom of the patient details report and select "Prompt at Consult - Topbar" then click on "Go" to give the new prompt a name.

The name you enter is the prompt text displayed in Topbar, so choose a simple but clear name that tells the clinician seeing the prompt what should be done.

Patient Reidentification

1 of 3

Reidentify Report [patient count = 103]
 Filtering By: Conditions (Diabetes - Yes), Last Results <= 12 mths, Selected: H

ID	Surname	First Name	Known As	Sex	D.O.B	Address

To Export Patient List to Microsoft Excel:

1. Click on the "Export Icon" at the top of the Patient Reidentification window.
2. Click on "Excel"
3. Choose a file name and a location to save to (eg. Create a folder C:/ClinicalAudit/CAT Patient FollowUp)
4. Click "Save"

The steps above will produce a list of patients with contact details in MS Excel which can then be used to:

1. Go back through the individual patient records in the GP Clinical Desktop System (CDS) and update known records
2. Phone patients to update their record
3. Produce a mail merge to recall patients for follow up
