# Health Path Ways App

Unknown macro: 'export-link'

For organisations using HealthPathWays in their region the related Topbar app provides a simple one-click access to the HealthPathWays website. Topbar will show the app name (default is HealthPathWays) on top of your screen. In the screenshot below the PHN region name is displayed as well. This can be different for each PHN, but the icon will be the same for the app.

The app name with the logo of your organisation will be shown in the dashboard which opens when you click on the Topbar icon in the top left corner. For more general information on how to use Topbar see here: Topbar Apps

The screen above shows the Topbar dashboard with the all active apps listed, the Townsville HealthPathways logo is shown on the Health PathWays app.

A click on this app will open the linked site without the need to login - thus making it very quick and easy for the clinician to access the resources in your HealthPathWays site.

Latest Alerts and Updates

- **23 May – Cyber-attack alert**

  Recently many organisations around the world and the critical systems they depend on were victims of malicious "WannaCrypt" software. We advise all general practices to check the advice from Microsoft about installing the latest operating system updates and patches, and be alert to suspicious emails and attachments.

- **19 May – Alert: Ransomware cyber-attack affecting NHS in the UK**

  Read advice distributed by NQPHN on behalf of the Australian Digital Health Agency.

- Measles alert – infectious case confirmed in Townsville and Mackay.

- Dengue and Zika alert issued for Cairns, Innisfail and Townsville. The local Public Health Unit urges all clinicians to check travel history of any patient that may present with symptoms as per the dengue and zika pathways (February 2017).

Why can I see information not relevant to Townsville?

Pathways that have been developed by the Canterbury Initiative and are not yet localised to Townsville, have an orange background and this warning:

⚠ **This page has not yet been localised for Townsville**

Note: New Zealand pathways may contain useful condition management information. However, please use your judgement as to the appropriateness of this information for Townsville.

Over time all New Zealand Pathways will be localised to Townsville.
