# Demo Data

Right-click the link below and choose 'Save Target As...'. We recommend to always use the latest demo data as only the newest data set will contain all new reports and other features.

Save the file in your preferred folder. Then unpack (unzip) the data to your CAT extract directory (default is C:\Clinicalaudit)

Note: The file is 22MB+ in size - the 'Save As' dialogue box may take a bit to appear.

January 2021 data:

DEIDENTIFIED_DEMO-Data-V4-31.zip

The following dataset is designed for training of our users working mainly with Indigenous patients:

CAT 4.10 July 2018 Indigenous Training Data
