

Episode Count

This report shows a pie chart for the number of episodes of care provided to clients in the last 12 months. An episode of care is one or more contacts (with the same clinical reason) by a client with one or more health workers on the same calendar day. It is not possible to accurately determine the clinical reason in MD and BP, hence all contacts on the same calendar day are deemed an episode.. This graph supports the OSR Report Indicator CS-1.
