

CAT4 Release Notes V4.9 December 2017

CAT Release 4.9 - December 2017

This upgrade contains:

- HPV testing from 1/12/17: A new graph has been added under Screening > Cervical Screening Last Recorded. This includes HPV and Pap Smear testing to show which patients are up to date, overdue or not recorded.
Refer <http://help.pencs.com.au/display/CG/Cervical+Screening> for more information.
Available for MD, BP and Zedmed.
- HepB Screening and Management Tool: Central and Eastern Sydney PHN has developed this tool and made available for all CAT Plus users.
This is available under 'Viral Screening' and through Programs.
Refer <http://help.pencs.com.au/display/CG/Hepatitis+B+Screening+and+Management> for more information.
Available for MD, BP and Zedmed.
- Integration with Medilink billing system for MD and BP users.
- Updated Mappings for mammogram, pathology and immunisations.
