PAT Programs - Reporting

After a program has been created, approved and practices have been enrolled to use the program, data relevant to the program will be arriving in PAT CAT through the CAT4 data uploads. If a practice enrols a patient that information will be included in the de-identified data and PAT CAT allows to filter for prompt status. This in turn will allow the PHN or other organisation to report on health outcomes and quality improvement for the enrolled patient group and over time create data for regression analysis and evaluation of program success.

To use the program specific filter, PAT CAT needs to be in the PAT Programs screen - to get there click on the PAT Programs link:

	III PAT CAT	III PAT PROGRAMS	🍐 PRACTICES	皆 CUSTOM DATA	8 SUPPORT	LOG OUT
--	-------------	------------------	-------------	---------------	-----------	---------

Once the new page has loaded you will notice the change in logo on the top left:

On the Program Management window find your program and click on "Select"

Progr	Program Management X

	177		MHFL High Cholesterol	Approved	Enrolment	0	2	Prompts Displayed: 0 Prompts Accepted: 0 Prompts Dismissed: 0 Prompts Deferred: 0	15/02/2018	© Edit @ Select				

This will show you the selected program above the filters and you can click on "Deselect" to exit from this program.

🏘 patcat 🖪	ROGRAMS		all PAT CAT
- 2000 Import Shot	W Extracts	ers Reports Population	Prompts Programs Reports Programs
MHFL High Chole	sterol QDeselect		
General Practices	Ethnicity Conditions	Medications Results Patient Status	Health Care Homes Saved Filters Prompt
Gender Male Female Other	DVA DVA Non DVA	Age Start Age End Age Yrs Mths No Age	Last Visit Any None <6 mths <12 mths <15 mths <24 mths <30 mths Date Range 11 to 11 11 11 11 11 11 11 11 11 11 11 11 11

There is now a new filter tab available specific to the program you have selected called "Prompts". The contents of this tab will reflect the program selected, so if your program has multiple prompts each one will be shown. The example below is for the program created here: PAT Programs - Creating a new Program. This program has two enrolment prompts for patients meeting the criteria:

MHFL High Cholesterol @Deselect											
General	Practices	Ethnicity	Conditions	Medications Results F		Patient Status	Health Care Homes	Saved Filters	Prompt		
Important: When saving a filter or creating prompts, any selections made here are ignored											
Prompt Name			Accepted		Deferred	Dismissed	Dis	Displayed			
MHFL High Cholesterol											
High LDL											

The filter allows to select patients who have accepted enrolment into the program as well as patients where the prompt was deferred or dismissed by the clinician. The "Displayed" option will filter for those patients where the prompt was displayed but no other action was performed by the clinician. This can be used to evaluate how many patients met the prompt criteria as well measure the activity of clinicians in regards to the prompt displayed.

For a hyperlink prompt different options are shown - only the option "Accepted" and "Displayed" can be used for the filter. Accepted means that the clinician has clicked on the hyperlink and has accessed the site linked to the prompt, "Displayed" means no action was taken.
