Conditions – Other

Conditions included in Other are:

- Atrial Fibrillation
- Hyperlipidaemia
- Pregnancy
- Drug Abuse
- Hepatitis and Liver
- STI, including Chlamydia, Gonorrhoea, Trichomoniasis and Syphilis

Selecting Conditions by ticking the boxes will limit your data to look at only patients that match all the conditions ticked:

- Condition – Yes, No,
- no selection = All

You can select to filter by patients that

- Have a condition (tick the Yes box)
- Do not have a condition (tick the No box)

If you tick one of the main condition headings (bolded) the sub-heading selections will not be available and all patients matching any of the conditions listed below will be selected. This is an OR search, as opposed to selecting each condition separately which will result in an AND search.

In some filters there is a heading in *italics* and <u>underlined</u> , for example the <u>*Cardiovascular Disease (CVD)*</u> and <u>*Bone Disease*</u> in the screenshot above. Selecting this heading will create a filter for patients with any of the specific conditions listed below, in the case of <u>*Cardiovascular Disease (CVD)*</u> it will include patients with any of the conditions CHC, Stroke, MI, PVD, Carotid Stenosis and Renal Artery Stenosis. This is an OR search, meaning that all patients with at least one of the listed conditions will be shown.
