DATA FILTERING

Data filtering enables viewing graphs and reports based on specific criteria. The data filters are organised into a series of tabs:

- General (Demographics including Health Cover and DVA status)
- Ethnicity
- Conditions
- Medications
- Date Range (Results)
- Date Range (Visits)
- Patient Name
- Patient Status
- Providers
- Risk Factors
- Health Care Homes Filter (if participating in the trial)
- Custom Filters

Another tab is provided for you to save a specific set of filter criteria: Saved Filters

To filter the data, simply select the criteria you wish to view. This is generally done by ticking selection boxes, however some filters are based on entering information such as a Postcode or Suburb. The criteria on which you are filtering is displayed at the top of the Results panel, this display remains even if the Filter panel is hidden.

Click 'Recalculate'.

You will see the 'status bar' in the top right hand corner of the screen flashing while the filtered data is reloaded from the 'snapshot' into CAT4. This will update to Results panel to look at only patients that match all the conditions ticked. Example:

Collect Ethnicity C Chronic Mental Heal	Hide Filter	Report Populations Date Range	wition Dashboard (Results) Date R	CAT4 CAT4 ange (Visits) Patient	sing Registrar T CAT	Daily CAT	< Factors Save	d Filters		Clear Fitters Recolouted	
Diabetes		Respiratory		Cardiovascular				Musculoskeletal		Renal Impairment
