

Healthy For Life Report

Healthy for Life (HFL) is a program funded by the Office of Aboriginal and Torres Strait Islander Health (OATSIH) which aims to improve the health outcomes of Aboriginal and Torres Strait Islander peoples. 10 essential indicators have been developed for reporting purposes. These indicators cover the areas of:

- Maternal and Antenatal (indicators 1-4)
- Child Health (indicators 5)
- Adult Health (indicators 6-10)

The CAT4 HFL Report is available for clinical systems where the CAT4 data extract meets the CAT4 data specifications version 1_6 or higher. MBS Item Indicators in the report are available where the clinical and billing systems are provided by the same vendor.

More information is available in the [CAT4 HFL Quick Reference Guide](#) .
