

# Send Data History

Any activity using the 'send to' function will be logged and the log is accessible under Tools/Send Data History. The history is presented in a new window and will show successful as well as unsuccessful attempts. This can be used for trouble shooting and provides a record for the clinic. The history shows which data file was sent, when, where and by who.

The screenshot shows a window titled "Send Data Extracts History" with a table containing two rows of data. The table has eight columns: Date, File Sent, Location Sent To, Result, Date Sent, Sent By, Type, and Message. The first row shows a successful data extract sent on 03/12/2013. The second row shows a failed attempt on 10/10/2014 due to a connection error. An "OK" button is located at the bottom right of the window.

Date	File Sent	Location Sent To	Result	Date Sent	Sent By	Type	Message
26/11/2013 04:05 PM	XML Data File	nm	Success	03/12/2013 02:26 PM	Matthias	Manual	Data extract successfully sent.
09/10/2014 12:20 PM	XML Data File	Test Medicare Local Itp	Failed	10/10/2014 12:32 PM	Matthias	Manual	Error.Unable to connect to the remote server
