Screening

The Screening tab contains reports on cancer screening, being Cervical Screening, Pap Smear, Mammogram and FOBT screening. Due to the format of these tests we are unable to report on the **result** of the test, but we can show the number/percentage of patients who had the test done. Please see the other pages in this chapter for the full details.

- Cervical Screening
- Pap Smear
- Mammogram
- FOBT
- Diagnosis Codes Screening Tests
- DEXA screening
