

Find all patients with cancers who are more likely to have their life limited by their illness

Unknown macro: 'export-link'

Recipe Name:	Find all patients with cancers who are more likely to have their life limited by their cancer condition
Rationale:	<p>Cancer is a leading cause of death in Australia and therefore patients with cancer are at higher risk of death¹.</p> <p>Non-melanoma skin cancers, or keratinocyte cancers, are the most common cancers in Australia, however most are not life-threatening. There are two main non – melanoma types: basal cell carcinoma (BCC) and squamous cell carcinoma (SCC)². Therefore these conditions are excluded from this recipe.</p> <p>Patients living with cancer may have palliative care needs³.</p> <p>This recipe assists practitioners to identify patients with potential palliative care needs.</p> <p>1 https://www.cancer.org.au/cancer-information/what-is-cancer/facts-and-figures</p> <p>2 https://www.cancer.org.au/cancer-information/types-of-cancer/non-melanoma-skin-cancer</p> <p>3 https://www.cancer.org.au/assets/pdf/understanding-palliative-care</p>
Target:	Patients diagnosed with forms of cancer that may limit their life
Recipe Limitations:	Diagnosis needs to be coded in patient record
