Clear Conditions

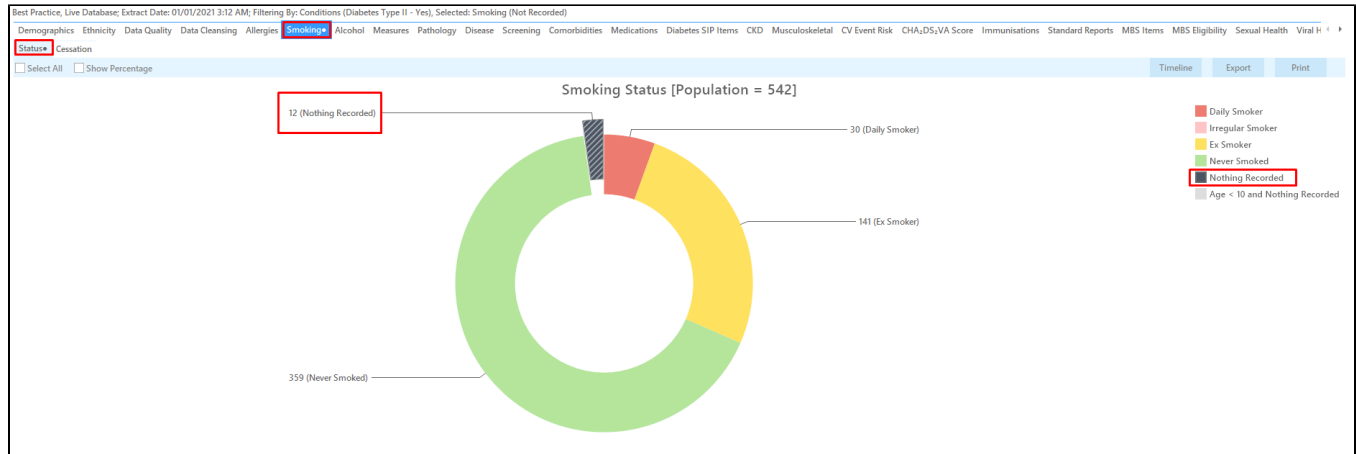

- Click "Recalculate"
- Click 'Hide Filters'

Report Steps

To check the smoking, alcohol and physical activity status, you need to check the relevant report tabs. You can switch the view from numbers to percentage in the top left corner of each report.

Smoking

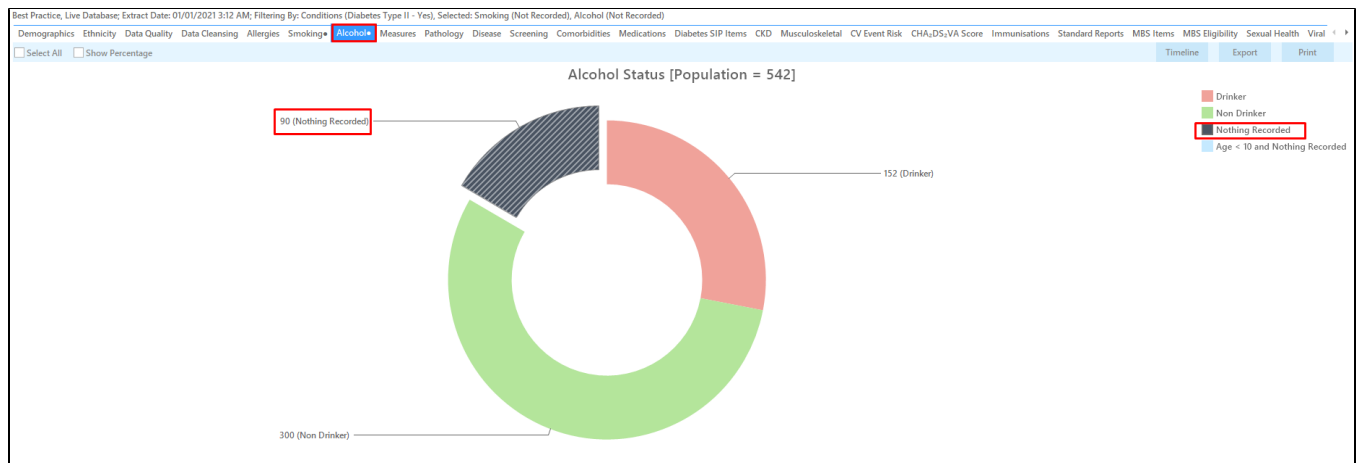

Click on the 'Smoking' tab in the reports section to see the numbers/percentages of patients with a smoking status recorded. As we have applied a filter for Type II diabetes, only those patients will be listed in the report.

A double click on the 'Nothing Recorded' part of the graph or the legend will display the details of the patients. Topbar prompts for missing smoking status in the [data cleansing app](#) when a patient is in the consult room as a reminder for clinicians to check the smoking status.

Alcohol

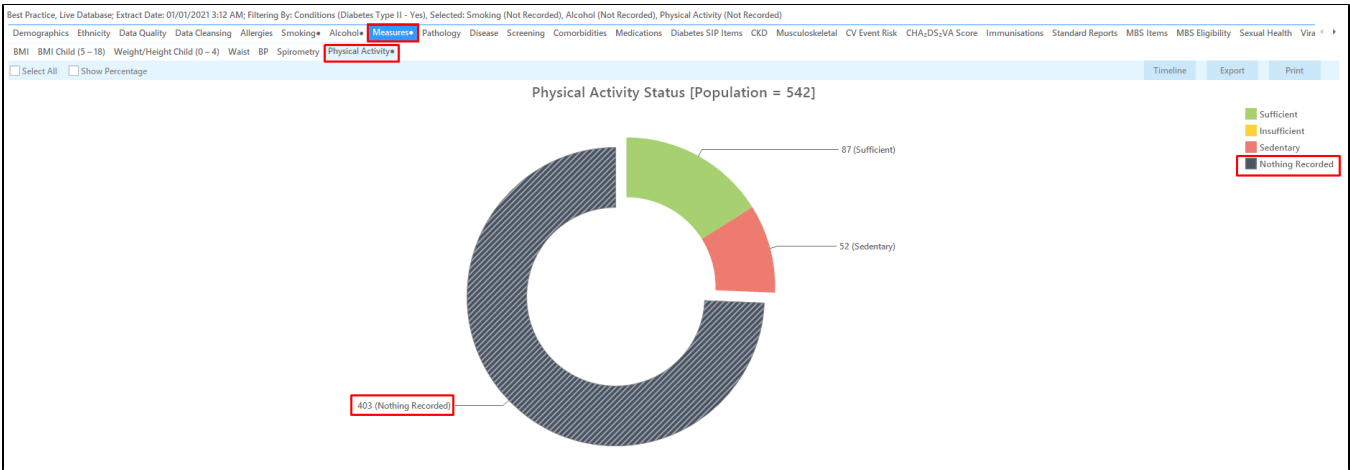

Click on the 'Alcohol' tab in the reports section to see the numbers/percentages of patients with an alcohol status recorded. As we have applied a filter for Type II diabetes, only those patients will be listed in the report.

A double click on the 'Nothing Recorded' part of the graph or the legend will display the details of the patients. Topbar prompts for missing alcohol status in the [data cleansing app](#) when a patient is in the consult room as a reminder for clinicians to check the smoking status.

Physical Activity

Click on the "Measures/Physical Activity" tab in the reports section to see the numbers/percentages of patients with a smoking status recorded. As we have applied a filter for Type II diabetes, only those patients will be listed in the report.

 Please note that for BP users the physical activity is only saved in your clinical system if you print a 'prescription' for physical activity!
