

Identifying Coronary Heart Disease (CHD) patients not on ACE or ARB medication

 Unknown macro: 'export-link'

Recipe Name:	Identifying Coronary Heart Disease (CHD) patients not on ACE/ARB medication
Rationale:	Biomedical risk factor modification – treat to target. Reducing Risk in Heart Disease guidelines recommend that ACEIs be considered in all patients with CHD, especially in those at high risk, unless contraindicated.
Target:	All active patients currently on your system (active = 3 or more visits in the last 2 years) that have been diagnosed with CHD are not on ACE or ARB medication.
CAT Starting Point:	<p>1. CAT Open 2. Population Extract Loaded and Extract Pane "Hidden" 3. OPTIONAL ONLY{}: Filter Pane Open and, under the General Tab, "Active Patients (3x < 2 years)" selected</p> <p>*The decision to select either "Active" or "All" patients is left to the practice to make</p> <p>¹ National Stroke Foundation. Clinical Guidelines for Stroke and TIA Management: A guide for general practice, pp4, 2008.</p>

In the Filters Pane:

1. In the "Conditions" tab select "CHD"

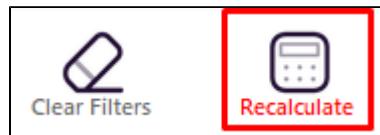

General	Ethnicity	Conditions	Medications	Date Range (Results)	Date Range (Visits)	Patient Name	Patient Status	Providers	Risk Factors	MBS Attendance	Saved Filters

Refine Selection Add/Withdraw Patient Consent GoShare Plus SMS Recall Voicemail Recall Topbar Prompt

To Export Patient List to Microsoft Excel:

- Click on the "Export Icon"  at the top of the Patient Reidentification window.
- Click on "Excel"
- Choose a file name and a location to save to (eg. Create a folder C:/ClinicalAudit/CAT Patient FollowUp)
- Click "Save"

The steps above will produce a list of patients with contact details in MS Excel which can then be used to:

- Go back through the individual patient records in the GP Clinical Desktop System (CDS) and update known records
- Phone patients to update their record
- Produce a mail merge to recall patients for follow up

Create a prompt to display in Topbar

Remember you need to be in the CAT4 Daily View to be able to create prompts. Other pre-requisites are:

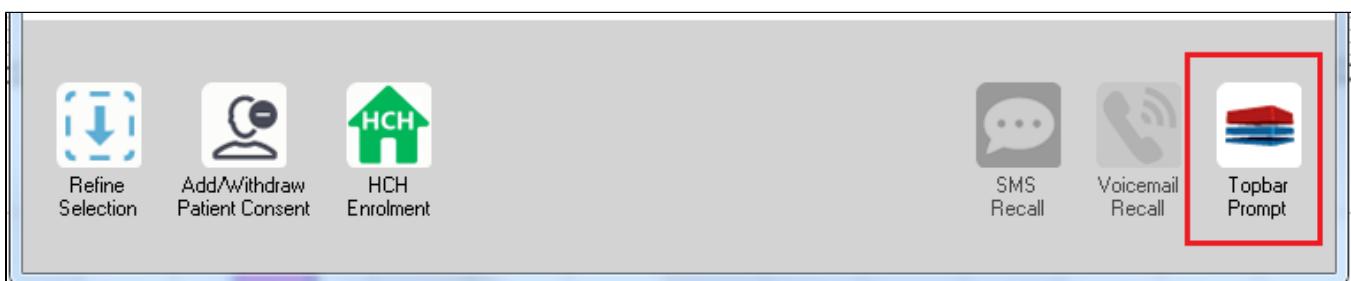

- Topbar is installed
- CAT4 is linked to Topbar via Edit/Preferences/Topbar - check here for details: [Linking CAT to Topbar](#)

To start click on the 'Daily View' icon on the top of your CAT4 screen:

Once you have applied the filter(s) and displayed the patients of interest as described above, you can create a prompt that will be shown to all clinicians using Topbar if a patient meeting the prompt criteria is opened in their clinical system. The full guide is available at [CAT PLUS PROMPTS](#) and a short guide on how to create prompts in CAT4 can be found at [Creating a Prompt in CAT4](#)

To start you have to use the drop-down menu at the bottom of the patient details report and select "Prompt at Consult - Topbar" then click on "Go" to give the new prompt a name.

The name you enter is the prompt text displayed in Topbar, so choose a simple but clear name that tells the clinician seeing the prompt what should be done.
