

Identify Patients with Hepatitis C

Unknown macro: 'export-link'

Recipe Name	Identify Patients with Hepatitis C
Rationale	As there is now a cure available for hepatitis C it is useful for practices to identify those patients diagnosed with hepatitis C to recall and treat them.
Target	Patients with hepatitis C who have not been treated yet
CAT Starting Point	<ol style="list-style-type: none"> 1. CAT Open – CAT4 view (all reports) loaded 2. Population extract loaded and extract pane "hidden" 3. Optional Only ★: Filter Pane Open and under the 'General' tab, "Active Patients (3x < 2 years)" selected <i>*The decision to select either "Active" or "All" patient is left to the practice to make</i>

- In Filters Pane
 1. Select 'Conditions' tab
 2. Click 'Other' tab then check 'Hepatitis C' under **Hepatitis and Liver**

Refine Selection Add/Withdraw Patient Consent

GoShare Plus SMS Recall Voicemail Recall Topbar Prompt

This list can be used as a source for recall using [Recall CAT](#) or, if you are using Topbar, you can create [Topbar prompts](#) for these patients to alert the providers when anyone on this list is visiting.

Create a prompt to display in Topbar

Remember you need to be in the CAT4 Daily View to be able to create prompts. Other pre-requisites are:

- Topbar is installed
- CAT4 is linked to Topbar via Edit/Preferences/Topbar - check here for details: [Linking CAT to Topbar](#)

To start click on the 'Daily View' icon on the top of your CAT4 screen:

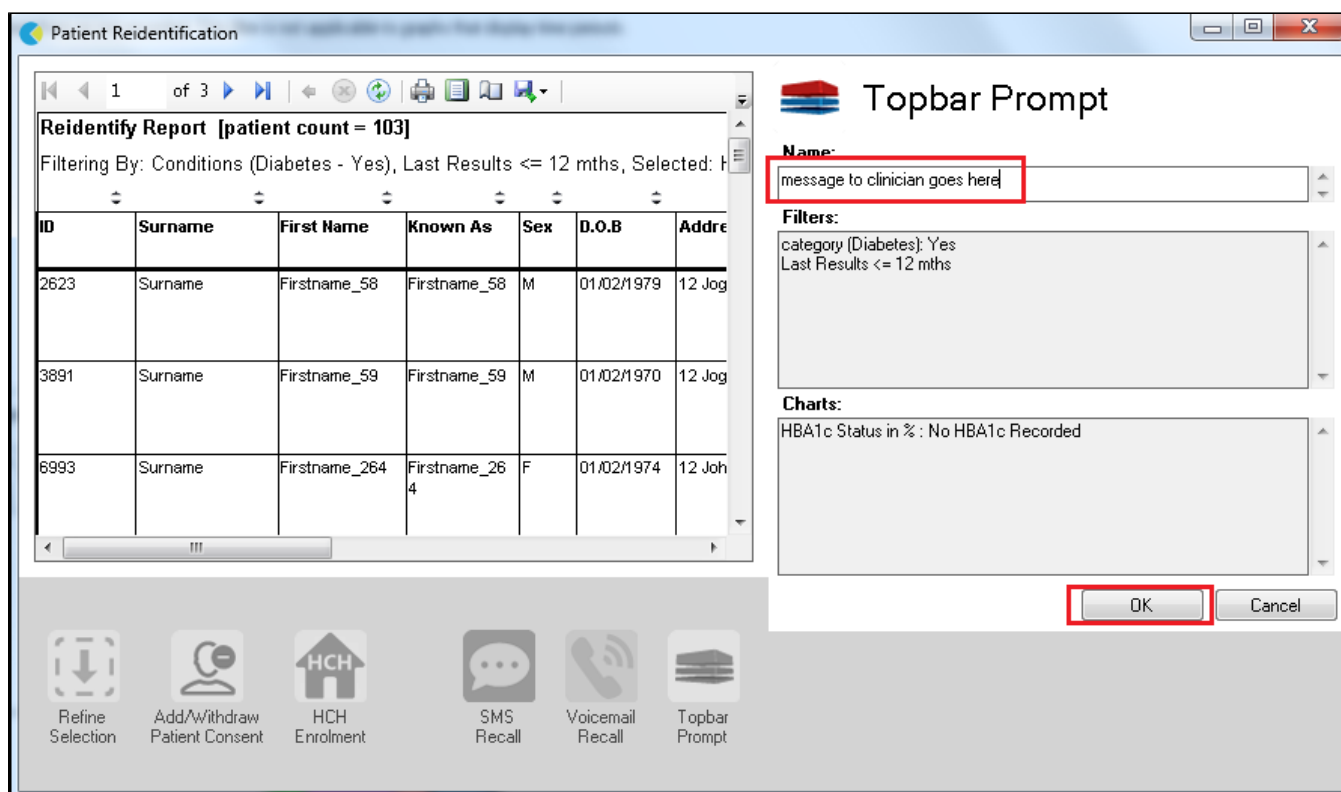

Once you have applied the filter(s) and displayed the patients of interest as described above, you can create a prompt that will be shown to all clinicians using Topbar if a patient meeting the prompt criteria is opened in their clinical system. The full guide is available at [CAT PLUS PROMPTS](#) and a short guide on how to create prompts in CAT4 can be found at [Creating a Prompt in CAT4](#)

To start you have to use the drop-down menu at the bottom of the patient details report and select "Prompt at Consult - Topbar" then click on "Go" to give the new prompt a name.

The name you enter is the prompt text displayed in Topbar, so choose a simple but clear name that tells the clinician seeing the prompt what should be done.

Exporting and Printing Reports

To Export Patient List to Microsoft Excel:

1. Click on the "Export Icon" at the top of the Patient Reidentification window.
2. Click on "Excel"
3. Choose a file name and a location to save to (eg. Create a folder C:/ClinicalAudit/CAT Patient FollowUp)
4. Click "Save"

The steps above will produce a list of patients with contact details in MS Excel which can then be used to:

1. Go back through the individual patient records in the GP Clinical Desktop System and update known records
2. Phone patients to update their record
3. Produce a mail merge to recall patients for follow up
