

Influenza Timeline Vaccine Cover

This report is designed to show a practice the amount of vaccines recorded at the practice in a rolling twelve month period. The intent is to inform how many vaccines were used last year so that the correct amount can be ordered for next year.

The reference date in the top right corner can be used to set the report to the date of interest, generally speaking this report will become more useful at the end of a calendar year due to the release of new vaccines early in the year.
