

COVID-19 General Population - Booster Report

This report shows all patients in your clinic eligible for a booster shot which is currently 2 shots at least 3 months ago. As this is based on current medical advice, we have designed the eligibility criteria to be adjusted as new advice is received, thus ensuring your reports remain up to date.

As of the 27/01/2022 patients who had their last vaccine at least 90 days (3 months) ago are considered eligible for the booster shot. This rule has been applied to the report automatically.
