

Shingles

National Immunisation Program (NIP) schedule for Shingles (see reference):

From 1 November 2023, the shingles vaccine Shingrix® replaced Zostavax® on the National Immunisation Program (NIP) schedule for the prevention of shingles and post-herpetic neuralgia. It will be available for eligible people most at risk of complications from shingles.

A 2-dose course of Shingrix® will be available for free for:

- people aged 65 years and older
- First Nations people aged 50 years and older
- immunocompromised people aged 18 years and older with the following medical conditions:
 - haemopoietic stem cell transplant
 - solid organ transplant
 - haematological malignancy
 - advanced or untreated HIV.

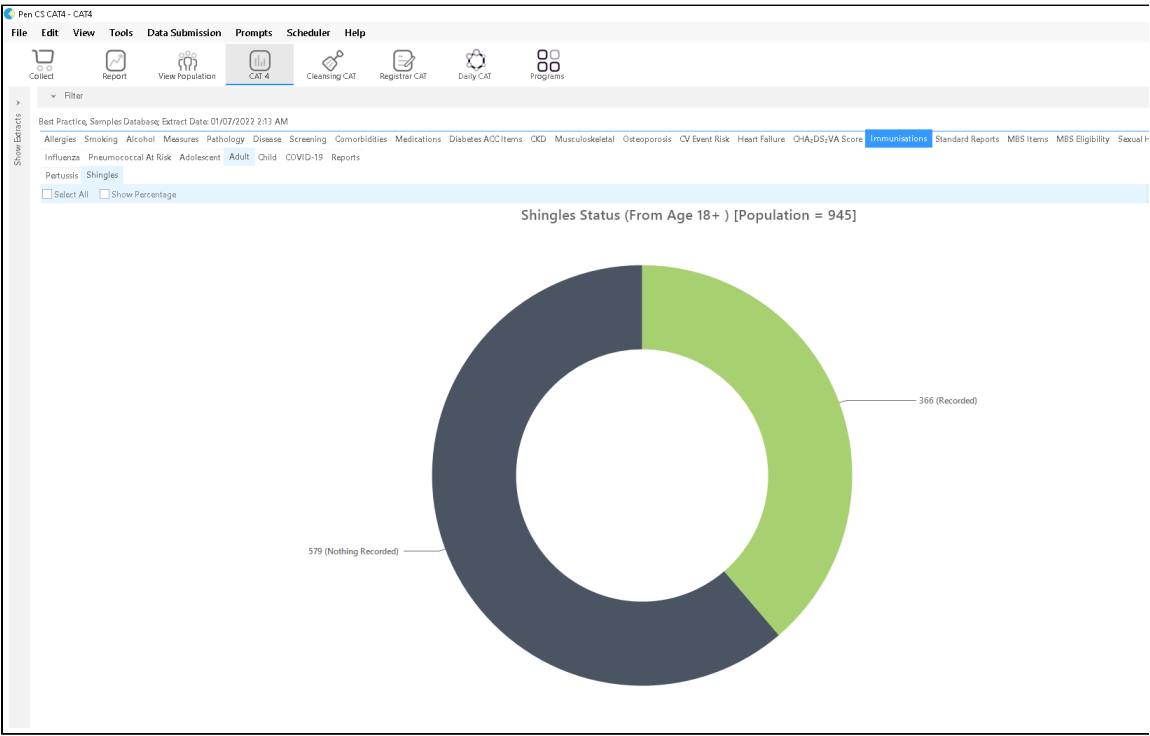

Shingles Report:

Shingles graph provides a pie chart by immunisation status for population aged 18 and over.

To find eligible patients, please apply the filters as per the recipes attached below.

The categories provided are:

- Recorded
- Not Recorded

Recipes:

Please use the below recipes to find the eligible population for Shingles vaccination

Eligibility 1: people aged 65 years and older

Shingles_Eligibili...e - 17.11.2023.pdf

Eligibility 2: First Nations people aged 50 years and older

Shingles_Eligibili...e - 17.11.2023.pdf

Eligibility 3: immunocompromised people aged 18 years and older with the following medical conditions:

- haemopoietic stem cell transplant
- solid organ transplant
- haematological malignancy
- advanced or untreated HIV.
