# Smoking

Smoking displays your data as a breakdown of smoking status: Daily Smoker, Irregular Smoker, Ex Smoker, Never Smoked, Nothing Recorded. The data is displayed as a pie chart.

The 'Cessation' report is currently only available for MD3 users and shows the 'Stage of change assessment' from the patients smoking assessment. This report is using the daily and irregular smokers only as cessation is not relevant for non or ex-smokers.
The pie chart shows the number and percentage of patients ready to quit, intending to quit, not ready to quit, nothing recorded or 'other', with 'other' being a 'recent quitter' in the MD3 patient record.
